

# AMBERTEC

## Deposition Processor

*The **Ambertec Deposition Processor** is a unique system for collection and analysis of sticky deposits from paper machine process water or stock samples.*

- ✦ ***Simulate the critical changes in process conditions by running variable environment cycles***
- ✦ ***Separate and collect sticky deposits (e.g. pitch, white pitch) from:***
  - o White water and other process waters*
  - o Process waters in mechanical pulping*
  - o Stock samples*
- ✦ ***Perform quantitative and qualitative analysis***
- ✦ ***Based on technology by Raisio Chemicals and UCM***
