

AMBERTEC

FastVision3

*The **Ambertec FastVision3** is an advanced digital high speed imaging system for all occasions that are impossible to see with a naked eye or video camera - it is upto 400 times faster than ordinary video: Max recording speed 10 000 frames per second !!*

- ✦ **See all rapid events that happen too fast for the human eye**
- ✦ **Synchronize image capture to process signals or images**
- ✦ **Use for vibration or movement analysis**
- ✦ **Excellent for runtime troubleshooting**
- ✦ **Use for exact timing or synchronization of two process stages or drives**
