

AMBERTEC

Surface Orientation Profiler

*The **Ambertec Surface Orientation Profiler** automatically scans and analyses paper surface fibre orientation from both sides of a cross-machine sample within just a few seconds, detecting the areas which most likely will curl or cockle.*

- ✦ **Know two-sidedness of the fibre orientation**
- ✦ **Get CD profile of the fibre orientation two-sidedness**
- ✦ **Find the parts of the web that most likely will curl or cockle**
- ✦ **Obtain curling probability index**
