

AMBERTEC

Beta Formation Analyzer

*The **Ambertec Beta Formation** method is a unique, reliable de-facto world standard in paper industry for analysis of formation variations (small-scale distribution of basis weight) in paper and board, non-woven, etc.*

- ✦ **Obtain the true basis weight variation**
- ✦ **Visualize local small (millimeter) scale basis weight variations**
- ✦ **Measure all paper and board grades - also coated and printed**
- ✦ **Formation affects other paper properties: absorption, calender blackening, coating and printing quality, etc.**
